

Capability Statement

Acknowledgment of Country

Active Data Tech acknowledges the Peramangk and Kaurna people as the Traditional Custodians of the Adelaide Hills and Adelaide Plains, where we reside. We acknowledge the Traditional Owners of Country throughout Australia. We recognise their deep and continuing connection to the land, waters, and community. We pay our respects to the people, the cultures and the Elders past, present and emerging.

Company Overview

Established in January 2019 Active Data Tech is a professional services company specialising in telecommunication construction and solutions. Since our inception, we have facilitated seamless connectivity for our clients across commercial, government, and private sectors, offering direction and opportunities to achieve innovative and robust outcomes through technological advancements.

Our team delivers telecommunications infrastructure projects, combining technical expertise with proven project management to transform communities and exceed client expectations.

As a 2-generation family business commencing in South Australia, Active Data Tech has built its foundation with trusted employees who are dedicated to serving the community and sharing in the vision of a connected future.

Our capabilities are set across telecommunications, network infrastructure, optical fibre and civil construction, providing end-to-end projects. We are committed to our mission and vision 'connecting communities' with our values being a basis of who we are and what we do.

Our purpose is to deliver network infrastructure and solutions to connect communities

As part of the digital era, creating infinite possibilities for communities and businesses to be inspired

Teamwork > Collaboration to achieve together, delivering great results

Commitment > Delivering on today and tomorrow to connect our communities

Shaping our service in excellence

Empowerment > Progressive and innovative mindset to advance, strive to be better in all we do

Vitality > Humming with a diverse and inclusive environment, operating with integrity

Underpinned by Safety > Safety and wellbeing are at the forefront for our people, our clients and our communities

Our Capabilities

At Active Data Tech, we provide end-to-end infrastructure solutions in telecommunications, civil construction, optical fibre and electrical services. Known for reliability and technical expertise, we work collaboratively with clients to deliver safe, professional, and high-quality outcomes.

Our integrity and professional astuteness is our strength in delivering on complex projects for customers. Backed by a proficient team, a modern fleet, and streamlined planning, we mobilise quickly and deliver confidently across local, regional, and remote areas.

From new network rollouts to upgrades and maintenance, we have a solutions-driven approach to deliver on outcomes. Active Data Tech is an integral part in providing essential infrastructure that keeps communities and businesses connected.

Telecommunications

Network Solutions

Optical Fibre

Civil Constructions

Telecommunications

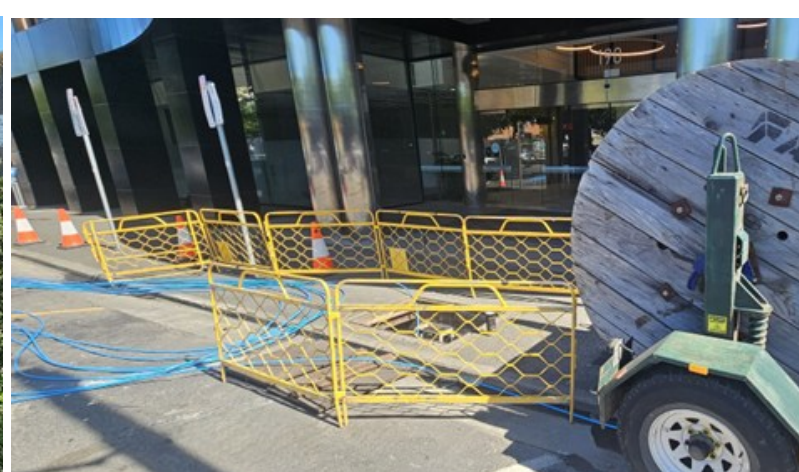

Active Data Tech deliver comprehensive telecommunication fibre network solutions with an unwavering focus on quality, reliability, and safety. With proven expertise across the full project lifecycle, we provide tailored services to meet the needs of clients in metropolitan, regional, and remote environments.

Our telecommunications capabilities include:

- **End-to-end fibre solutions** – From initial network design through installation, commissioning, and fault rectification, we ensure seamless delivery and long-term performance
- **Fibre network builds** – Expertise in FTTP, FTTN, FTTB, and FTTC deployments, delivering robust infrastructure for high-speed connectivity
- **Surveying and enabling works** – Including detailed survey work, pipe proving, and rod and roping to prepare networks for efficient builds
- **Cable hauling and jointing** – Skilled in handling cables from 72F to 576F, ensuring precision and efficiency in deployment
- **Fibre splicing, testing, and commissioning** – High-quality splicing from exchanges to live joints and dark fibre across varied environments local to regional centres
- **External and internal works** – Delivery of both outside plant and internal installations, including Multi-Dwelling Units (MDUs).
- **Quality assurance** – Rigorous testing and compliance checks on all completed works to guarantee performance and reliability.

Quality Craftsmanship

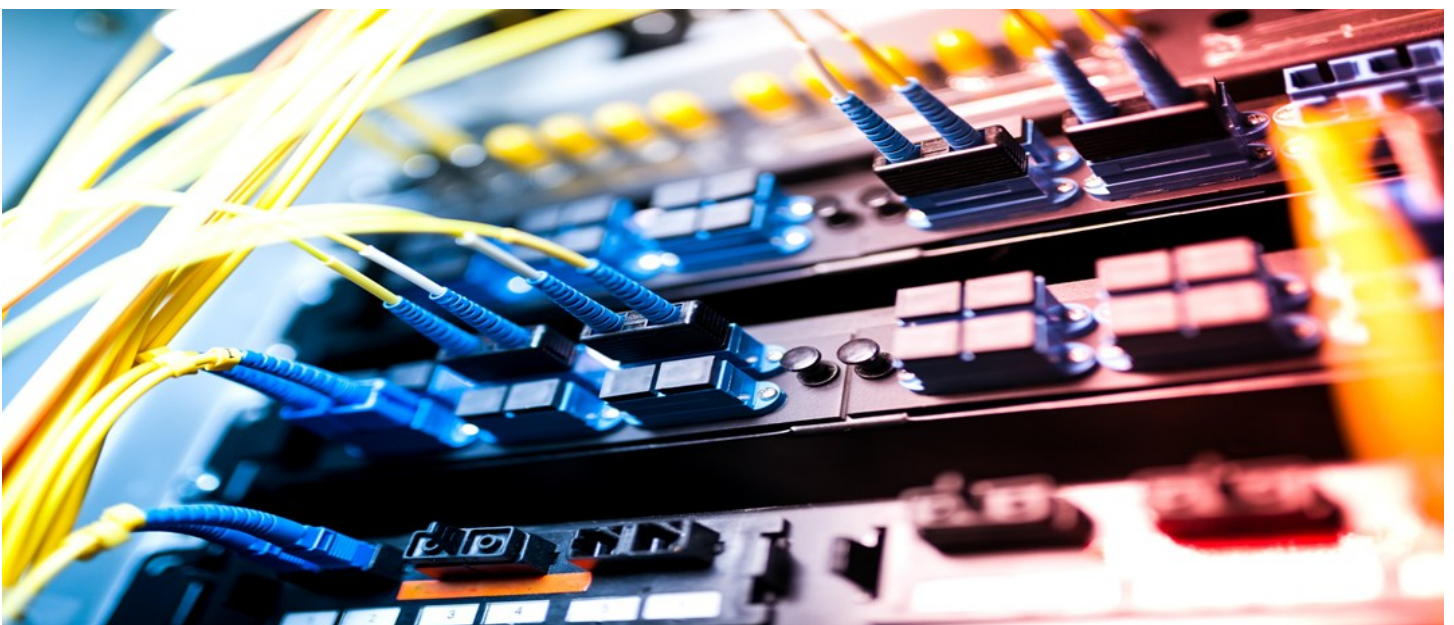

Network Infrastructure

At Active Data Tech, we bring together physical infrastructure, software, and services to deliver end-to-end network solutions that are reliable, scalable, and built to the highest industry standards. Our experienced team provides expertise across the full lifecycle of network infrastructure projects — from initial design to commissioning and certification.

Our capabilities include:

- **Design and construction of infrastructure systems** – Tailored solutions to meet the demands of modern networks, ensuring efficiency, performance, and compliance
- **Structured and optical fibre cabling** – Installation of high-capacity cabling systems to support telecommunication services
- **Joint work** – Skilled preparation and installation of Tyco, Corning, and Commscope joints, ensuring seamless fibre connectivity
- **Hardware installation** – Rack builds, equipment installation, and integration across exchanges, data centres, and client premises
- **Fibre splicing** – Expertise in both single and ribbon fibre splicing, with precise testing and validation
- **On-site operations** – Safe and efficient delivery of works in client premises, exchanges, and high-security data centres
- **Integration and verification** – Comprehensive testing, validation, and client acceptance processes to ensure performance from day one
- **Commissioning and certification** – Full system commissioning, backed by formal certification to industry and carrier standards.

We operate across exchanges, data centres, and client premises, working to industry standards with NBN, Telstra, 5GN, TPG, and Optus, with additional accreditation under NBN enAble and Telstra DECAF

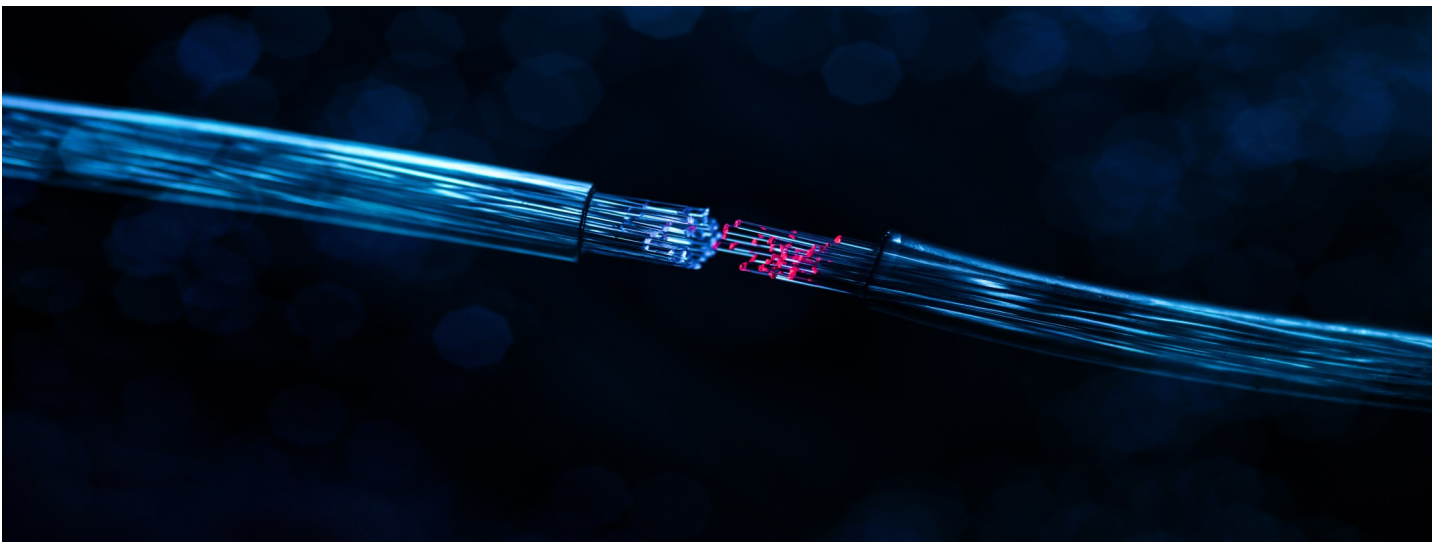

Keeping people and businesses connected

Optical Fibre Specialists

We have our team of Optical Fibre Specialists available to ensure optimal connectivity

- We provide seamless, high-speed connectivity with our expert fibre optic communication system setup and installation service. Designed for businesses and organisations seeking reliable and efficient data transmission
- Our skilled technicians handle installation of fibre optic cables, configuration of network components, and comprehensive testing to guarantee optimal performance. Whether upgrading existing infrastructure or installing new systems, we deliver tailored solutions and minimise downtime
- Experience faster data transfer, enhanced network security, and future-proof communication with our professional fibre optic installation service—your gateway to cutting-edge connectivity
- Our advanced diagnostics solution employs cutting-edge OTDR (Optical Time-Domain Reflectometer), Insertion Loss, and other state-of-the-art testing technologies to ensure comprehensive verification of your network's integrity, performance, and compliance
- Capabilities include fault finding and rectification, signal loss measurement, and comprehensive validation of fibre optic and other network infrastructures

Seamless, high-speed connectivity

Civil Constructions

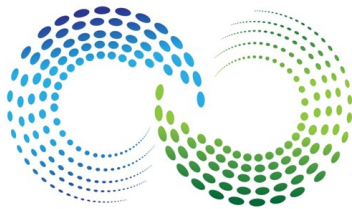

Delivering comprehensive civil works as part of our end-to-end infrastructure solutions, ensuring projects are completed safely, efficiently, and to the highest standards.

- **Telstra DECAF Accredited** – trusted to deliver compliant works for critical telecommunications infrastructure
- **Utility Detection** – accurate identification and mapping of underground services to prevent damage and ensure safe excavation
- **Trenching** – precision trenching for cable and pipe installations, using industry best practice to minimise disruption
- **Pit and Pipe Construction, Installation and Replacement** – complete services for new builds, upgrades, and maintenance across metro, regional, and remote sites
- **High-Pressure Duct Flushing** – clearing and preparing ducts for fibre installation, maintaining quality and reducing delays
- **Excavation** – safe and efficient excavation for diverse project needs, with modern plant and equipment
- **Concrete Cutting** – specialised cutting techniques for access, installation, and reinstatement works
- **ACM Removals** – licensed asbestos-containing material removal in line with strict safety and environmental standards

**Safety is a
fundamental
part of our
operations**
